Profile

With proficiency in HTML, CSS, JavaScript, React.js, Python, PHP, CodeIgniter, Bootstrap, and Django, I am a **proficient full-stack software engineer**. Building scalable, user-friendly applications that improve user experience and company efficiency is my area of expertise, and I have a solid foundation in both frontend and backend programming. I concentrate on producing secure, high-performing, and maintainable software solutions rather than just writing code. Web application development, database administration, authentication system implementation, payment integration, and UI/UX optimization for smooth interaction are all areas in which I have experience.

Education

Software Engineering, *Larry Computer Academy* 06/2021
Lagos, Nigeria
